CONNINTER · HOSPITAL VISITOR TRACKING

What we ask users, in each workflow

Distributor onboarding · Attendant visit pass · Visitor profile · Offline and online visit booking

Source of truth: live Conninter product forms (October 2026)

This document lists every parameter collected from the public, in the order the product asks for it. Required vs optional matches the current UI. Conditional fields appear only when an earlier answer requires them.

Contents

1. Distributor onboarding — /vendor/register
2. Attendant visit pass — scan hospital QR → /attendant-pass/<slug>/
3. Visitor profile — created during first booking (step 5)
4. Visit booking — offline (in-person) and online (video)
5. What happens after submit (system, not asked from the user)

How to read the tables

Yes — the form blocks continue if empty. **Optional** — shown but can be skipped. **Conditional** — shown only after another answer. Hospital is never chosen during distributor apply; it is chosen later when booking a delivery.

1. Distributor onboarding

Entry: Welcome → Distributor → Sign in → **Apply to onboard** (/vendor/register). Five steps, then a WhatsApp OTP on the mobile number.

Workflow

1. Open /vendor/register (or tap Apply to onboard from /delivery/login).
2. Step 1 — Account & contact.
3. Step 2 — Business identity (GST / PAN / legal entity).
4. Step 3 — Registered address (and operating address if different).
5. Step 4 — Upload compliance documents.
6. Step 5 — Operations, supply categories, and two declarations.
7. Submit. Conninter sends a 6-digit WhatsApp code to the mobile.
8. Enter the WhatsApp code. Account can then sign in at /delivery/login.
9. Hospital access is requested later, when booking the first delivery — not on this form.

Step 1 — Account & contact

Parameter	Required?	Notes / allowed values
Email (login)	Yes	Becomes the distributor sign-in ID.
Password	Yes	Confirmed on the next field.
Confirm password	Yes	Must match password.
Primary contact name	Yes	Person we reach for onboarding.
Mobile	Yes	10-digit Indian mobile. WhatsApp OTP is sent here after submit.
Alternate mobile	Optional	10-digit.
Designation	Optional	Job title of the primary contact.

Step 2 — Business identity

Parameter	Required?	Notes / allowed values
Legal entity name	Yes	Registered company / firm name.
Trade / brand name	Optional	If different from legal name.
Entity type	Yes	Proprietorship · Partnership · LLP · Pvt Ltd · Public Ltd · Others.
Vendor category	Yes	Pharma / medicines · Medical devices · Surgical consumables · Lab reagents · General stores · Linen / housekeeping · Catering (FSSAI) · IT equipment · Other.
GST registration type	Yes	Regular · Composition · Unregistered.
GSTIN	Conditional	Required unless GST type is Unregistered. 15 characters.
PAN	Yes	10-character PAN.
CIN	Conditional	Required when entity type is Pvt Ltd or Public Ltd.
MSME Udyam number	Optional	If registered under Udyam.
Year established	Optional	4-digit year.
Website	Optional	Company URL.

Step 3 — Registered address

Parameter	Required?	Notes / allowed values
Address line 1	Yes	Registered office street address.
Address line 2	Optional	Building, floor, landmark.
City	Yes	
State / UT	Yes	Indian states list, plus Other.
PIN code	Yes	6 digits.
Operating address same as registered	Yes	Checkbox. If unchecked, operating fields appear.
Operating address line 1	Conditional	Warehouse / dispatch address.
Operating city	Conditional	
Operating PIN	Conditional	6 digits.

Step 4 — Compliance documents

Parameter	Required?	Notes / allowed values
GST registration certificate	Conditional	Image or PDF. Hidden when GST type is Unregistered.
PAN card	Yes	Image or PDF.
Cancelled cheque / bank proof	Yes	Image or PDF.
Drug license number	Conditional	Optional extra. Shown only when vendor category is Pharma / medicines.
Drug license document	Conditional	Optional image or PDF. Pharma category only.

Step 5 — Operations & terms

Parameter	Required?	Notes / allowed values
Supply categories	Yes	One or more: medicines · implants · consumables · equipment · food · linen · lab · other.
Delivery mode	Yes	Own fleet · Third-party courier.
Primary goods description	Yes	Free text, e.g. injectable antibiotics.
Accounts email	Optional	For invoices.
Dispatch phone	Optional	10-digit.
Accept platform terms	Yes	Checkbox: Conninter terms and hospital vendor policies.
Declaration of truth	Yes	Checkbox: information and documents are true.

After submit — WhatsApp verification

Parameter	Required?	Notes / allowed values
WhatsApp code	Yes	6-digit OTP sent to the mobile from Step 1. Password login stays closed until this is entered.

Not asked on apply: hospital / branch. After approval, the distributor chooses or requests a hospital from the delivery booking screen.

2. Attendant visit pass

Entry: Welcome → **Attendant** → camera opens on /attendant/scan. The person scans the hospital QR at reception or the gate. That QR opens /attendant-pass/<branch-slug>/. There is no public “book attendant” button on the website.

Workflow

1. Scan the hospital QR (or enter the branch code on the scan screen).
2. Hospital / branch is already known from the QR. Confirm if the link was wrong.
3. Find the admitted patient — search by name (2+ letters) or look up by MRN.
4. Select the matching patient (name, MRN, ward / room shown).
5. Enter the attendant’s own details and optional companion.
6. Submit **Book pass** (blocked if another attendant is already checked in).
7. Primary (FIXED) attendant confirms on WhatsApp. Then today’s pass + QR is sent on WhatsApp.
8. Security scans that QR at the gate for entry and exit.

Step 1 — Find the patient

Parameter	Required?	Notes / allowed values
Hospital / branch	Yes	Usually pre-filled from the QR slug. Dropdown if the link does not match.
Search mode	Yes	Search by name · Search by MRN.
Patient name	Conditional	At least 2 letters. Then pick the patient from results.
Patient MRN	Conditional	From the admission document. Used with Look up patient.
Selected admission	Yes	Chosen from search results. System stores admission ID, not typed by the user.

Step 2 — Attendant details

Parameter	Required?	Notes / allowed values
Photo	Optional	Live camera or upload. Printed on the WhatsApp pass.
Full name	Yes	Attendant applying for the visit.
Email	Yes	Used for visit-complete notices.
Phone	Yes	WhatsApp destination for the pass / approval request.
Relationship to patient	Yes	Free text, e.g. Daughter, Spouse.
Add one person on this pass	Optional	Checkbox. Companion is metadata only — not a second pass.
Extra person name	Conditional	If companion is added.
Extra person phone	Conditional	If companion is added.
Companion relationship	Conditional	Relationship of the extra person to the patient.

Not asked from the family: ward, bed, visiting-window times, or pass number. Those come from the hospital admission and policy. Booking is refused outside the branch visiting window, or while another visitor is already checked in.

3. Visitor profile (create account)

A visitor profile is created the first time someone books a doctor and is not signed in. It is **Step 5** of the booking wizard (BookingProfileStep). The same fields are used on /visitor/register. Signed-in visitors skip this step.

Workflow

1. Start booking (Visitor pass or Online session). Steps 1–4 pick hospital, department, section, doctor.
2. If no visitor token: Step 5 — create profile (this section).
3. Upload photo and government ID (live camera or file).
4. Set password and accept terms.
5. Tap **Verify phone and continue**. Conninter sends a 6-digit WhatsApp OTP.
6. Enter the code. The account becomes ACTIVE and the visitor is signed in.
7. Continue to visit details (next chapter). Profile is reused for later bookings.

Parameter	Required?	Notes / allowed values
First name	Yes	
Last name	Yes	
Mobile number (WhatsApp)	Yes	10-digit. OTP is sent here. This is also a login ID.
Email	Yes	Login ID. Email OTP is not required to activate.
Email type	Yes	Personal · Work.
Company	Optional	Shown on the profile preview.
Job title	Optional	
Your photo	Yes	Live selfie (front camera) or JPEG/PNG/WebP upload.
Government ID type	Yes	Aadhaar · PAN · Passport · Driving licence · Voter ID · Other.
Other ID type	Conditional	Free text when type is Other.
Government ID image / PDF	Yes	Live photo of the ID (rear camera) or JPEG/PNG/WebP/PDF upload.
Password	Yes	At least 8 characters with upper case, lower case and a digit.
Confirm password	Yes	Must match.
Accept terms & privacy	Yes	Checkbox.
WhatsApp code	Yes	6-digit. Account activates when this is verified. Email verify is optional later.

4. Visit booking — offline and online

Same wizard: /book-appointment/. **Visitor pass** locks the visit as Offline (in-person). **Online session** locks it as Online (video). If opened without a lock, the visitor chooses Offline or Online on the details step. Signed-in visitors go from the doctor straight to visit details (step 5A).

Shared workflow (both modes)

1. Step 1 — Choose hospital (Ovum / Kauvery), then the centre / branch.
2. Step 2 — Select department (search from 3 letters).
3. Step 3 — Select section / sub-department.
4. Step 4 — Select doctor (name, department, location, qualification shown).
5. Step 5 — Create profile (only if not signed in) — see chapter 3.
6. Step 5A — Visit details: date, slot or custom request, purpose, carrying, visitor type, visit mode.
7. Step 6 — Pay the visit fee (wallet, Razorpay, or dummy pay in demo).
8. Doctor confirms or rejects. Offline: WhatsApp meeting pass + gate QR. Online: WhatsApp join links for doctor and visitor.

Steps 1–4 — Who they are visiting

Parameter	Required?	Notes / allowed values
Hospital chain	Yes	Partner cards, e.g. Ovum · Kauvery.
Hospital centre / branch	Yes	Centres of the chosen hospital only.
Department	Yes	Searchable list, minimum 3 letters to filter.
Section (sub-department)	Yes	Searchable list.
Doctor	Yes	Searchable list.

Step 5A — Visit details (asked every booking)

Parameter	Required?	Notes / allowed values
Appointment date	Yes	Calendar. Green days have published slots.
Available time slot	Yes*	Pick a published slot, or switch to a custom request. *Not charged if requesting a slot.
Request a visit slot	Optional	If no slot fits: send a time to the doctor. No payment yet.
Requested time	Conditional	Clock time, only when “Request a visit slot” is selected.
Purpose of the visit	Yes	3–191 characters. Shown to the doctor on WhatsApp.
What are you carrying?	Yes	Required for a paid booking (not for a slot request). Write “Nothing” if empty-handed. 2–500 characters.
Visitor type	Yes	General · Sales Representative · Vendor.
Company name	Conditional	Required when visitor type is Sales Representative.
Company email	Conditional	Sales Representative only. Attendance updates go here.
Visit type (mode)	Yes	Offline (in-person) · Online (video). Locked if the visitor opened Visitor pass or Online session.
First / last name, phone, email	Conditional	Only if the signed-in profile is missing contact fields. Otherwise shown as “booking as …”.

Step 6 — Payment (paid booking only)

Parameter	Required?	Notes / allowed values
Payment method	Yes	Wallet (if balance ≥ fee, default ■200) · Online (Razorpay) · Dummy payment (demo / testing).
Wallet recharge	Optional	If wallet is low: leave the wizard, recharge, return to payment.

Offline vs online — same form, different outcome

Topic	Offline (in-person)	Online (video)
How the visitor starts	Visitor pass → /book-appointment/?mode=offline	Online session → /book-appointment/?mode=online
Extra fields asked	None beyond the shared list. Carrying is still required (security at the gate).	None beyond the shared list. Mode is locked to Online.
After doctor approves	WhatsApp meeting pass with photo, doctor, date/time, check-in QR. Visitor shows QR at the gate.	WhatsApp join links to both doctor and visitor. In-app LiveKit room (/meet). No gate QR.
Check-in / check-out	Security scans the same QR for entry and exit. Slot clock starts at check-in.	Join / leave the video room. Webhook records check-in / check-out.
If there are no slots	Exit and notify me (WhatsApp when slots open), or request a visit slot.	Same waitlist / request options.

5. After submit — not asked from the user

These values are created by Conninter or the hospital. They are not form fields, but they complete the workflow.

Parameter	Required?	Notes / allowed values
Distributor vendor code	System	VEN-######. Wallet created at ■0 until hospital / demo credit.
Hospital approval of vendor	Hospital	Branch mapping APPROVED before the distributor can book that site.
Attendant pass number & validity	System	Issued after primary WhatsApp Confirm. Valid for today's visiting window.
Visit booking ID	System	Shown on confirmation. Fee held on wallet until the doctor confirms.
Meeting / delivery pass images	System	Composed and sent on WhatsApp. QR payload is signed by the server.
Online meeting room	System	Room visit-{id} and signed /meet links after online approval.

Quick map of public URLs

Parameter	Required?	Notes / allowed values
Distributor apply	—	/vendor/register
Distributor sign in	—	/delivery/login
Attendant scan (app)	—	/attendant/scan
Attendant apply	—	/attendant-pass/<branch-slug>/
Visitor profile + booking	—	/book-appointment/ (or ?mode=offline|online)
Visitor sign in	—	/visitor/login
Visitor dashboard / wallet	—	/visitor/dashboard · /visitor/wallet
